

Questionnaire

INTRODUCTION

So that we can better serve you, please take a moment to fill out this questionnaire. This will help us better understand your goals for the design and construction process ahead.

GENERAL

- Describe the makeup of your household (People and/or pets)

- What is your primary mode of transportation?

- Do you have any allergy concerns, toxic sensitivities, or any indoor air quality concerns?

- Do you have an idea of how much square footage you will require? If your program requires less will you consider it?

- Do you have a budget for construction? If not, what is your cost of construction per square foot expectation?

ENVIRONMENTAL CONSIDERATIONS

- Do you have any specific sustainable building goals? Examples: Optimize energy efficiency and renewable energy, protection and conservation of water, enhanced indoor environmental quality, and reduction of environmental impacts from material use.

- Do you have any interest in solar power? Would you like to learn more? Would you like a solar assessment of your site?

- Do you have any interest in geothermal heating? Would you like to learn more?

SITE CONSIDERATIONS

- Do you currently own a property upon which you would like to build? Do you have a site survey? Soils report? Depending on the site these items may be necessary for work to proceed.
- If you do not own a property, what characteristics are you looking for in a site?

DESIGN CONSIDERATIONS

- What do you like about your current home? What do you dislike?
- How long do you plan to live in this house? Are there future growth issues to consider?

- Generally speaking, if you had to choose between a low maintenance/higher cost house, and higher maintenance/lower cost house, which would you tend to choose?

- Without stating specifics (gable roof, cedar siding etc.) Describe how you wish the house to feel from the exterior and interior.

ADDITIONAL COMMENTS:
